Subject: UAT readiness - we need two more cycles and here is the arithmetic
Attachments: Go_Live_Readiness_Assessment_v0_9_DRAFT_recommendati.pdf; IMG_2291.JPG

Tom, Alicia,

247 open defects at SIT Cycle 1 exit, closure running at 1.4x arrival since 10/23, twenty-two working days to 12/13. That clears the backlog with roughly four days of margin, assuming nothing new arrives, which is not an assumption anybody should make.

The plan as it stands has UAT Phase 1 opening 12/02 with 412 scripted test cases, overlapping SIT Cycle 2 by nine working days. I do not think that works, and I would rather say so now than in the second week of December.

The reason is not defect count. It is people. Beth Ann's testers, Sandra's testers and Ray's testers are the same people who executed SIT scripts for us, and they are the only people who can execute UAT scripts. Running both simultaneously means each gets half the attention, and UAT is the one where Northbridge signs something.

What the plan actually needs is two additional UAT cycles - Phase 1 12/02 to 12/20, remediation over the holidays, Phase 2 01/06 to 01/24 - and a production date that follows Phase 2 rather than preceding it. That is a genuine change to the scope of testing services and Alicia will price it.

I am aware of how that sounds three weeks after a re-baseline that cost Northbridge nothing. I would rather be the person who says it in November.
